Create arc flash labels with ease using the **SafetyPro Arc Flash Label Printer**

One part is still missing from your arc flash project: labeling! You know exactly what you want from your arc flash analysis software, but have thought about what you need from your labels? Arc flash identification labels are the part of your analysis that will get the most attention and visibility; don't leave them to chance! Go with the #1 arc flash labeler in the industry: SafetyPro!

Durable 4mil poly-coated vinyl

Why make labels that won't last? While others spend time and money trying to look flashy, SafetyPro delivers real quality with 4-mil cast vinyl labels and a UV-protective poly overcoat. The difference is clear!

Works with SKM, etap, EasyPower and MORE

You want an arc flash label printer that will work with whatever software you are using, no limits! The SafetyPro ships with a standard Windows print driver, with both 32-bit and 64-bit support. You can print from SKM, etap, EasyPower, Excel, Word, or any other software that can format for your label size!

Complete package deals, at a price that fits your budget

One thing matters when it comes to a package deal: how many labels can you print for the price! Do the math and you'll find that label-for-label, SafetyPro offers the best price. And SafetyPro savings don't stop; once you buy you get:
