Service Temperature	-40F to 200F
Resistance	Significantly increases chemical, scratch, and UV resistance of the printed label
Shelf Life	2 year shelf life @ 68F to 77F, 50% RH

Beyond the Specs

Our attention to quality does not end with the raw material specifications— we are committed to continued testing and evaluation of our entire product line and warehouse practice. Our efforts include:

- ◆ Optimum storage conditions at all our managed facilities; manufactured and stored in a climate-controlled setting, at 68F to 77F.
- ◆ Careful inventory practices ensure timely delivery of critical products when you need them. We make every effort to plan for a stable inventory, and provide alternative products when needed.
- ◆ We utilize our materials in real-world applications, and observe supply durability over extended periods, so we can be certain we're offering a rock-solid product.
- ◆ Packing materials are designed to ensure safe transit to the end-user, with a minimum of waste.

Products may vary slightly from images shown.
